WORK EXPERIENCE

Starbucks (Seattle, WA)

Application Developer 2024-2025

- Automated financial systems in SQL for data ingestion to increase visibility on wall street reporting for 6700+ licensed stores
- Built new pages in React ensuring stores meet sustainability standards using our app
- Reduced stoppages by updating tooling and fixing key issues in C# in an app for truck delivery drivers
- Maintained financial systems and supply chain applications through an on call rotation

Starbucks (Seattle, WA)

Software Engineering Intern Summer 2023

- Developed an automation tool in Apex to create and populate customer and gift card data making this process >20x faster than the previous workflow and making it available 24/7
- Created a React app for new customer experience proof of concept in an internal hackathon placing in the scoring round of 16 teams

Quartz Imaging Corp. (Vancouver, B.C.)

Full Stack Developer Intern Summer-Fall 2022

- Developed in a C# backend along with a JavaScript/JQuery frontend in a Scrum environment
- Created an internal website using C#, SQL and the MVC design pattern to increase regression testing as well as to fix critical customer issues
- Designed and implemented a JavaScript page history navigator to improve customer workflow and decrease system repair complexity, reducing future development time by 2+%
- Improved release efficiency by adding new commands to an internal Python tool

CTLT, UBC (Vancouver, B.C.)

IT Technical Intern Winter 2021

- Designed and created a course outline map for engineering accreditation purposes and evaluation based on the Canadian Engineering Accreditation Board's (CEAB) desired program outcomes

TECHNICAL SKILLS

Frequent Use:	JavaScript/React	Python	C#	Git	SQL	Databricks
Familiar with:	ML/AI Development	Azure	Java	ASP.NET	Salesforce	

EDUCATION

University of British Columbia (Vancouver B.C.) — B.A.S.c. - Engineering Physics

2019-2024
